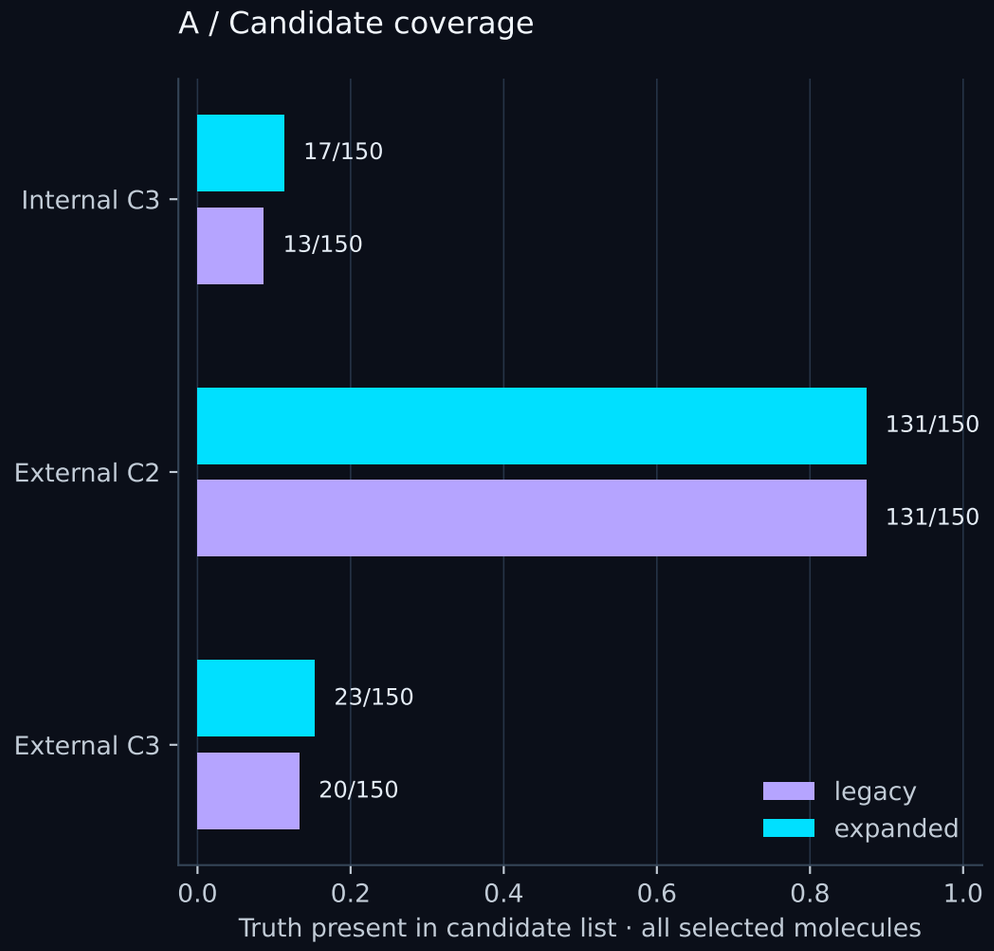
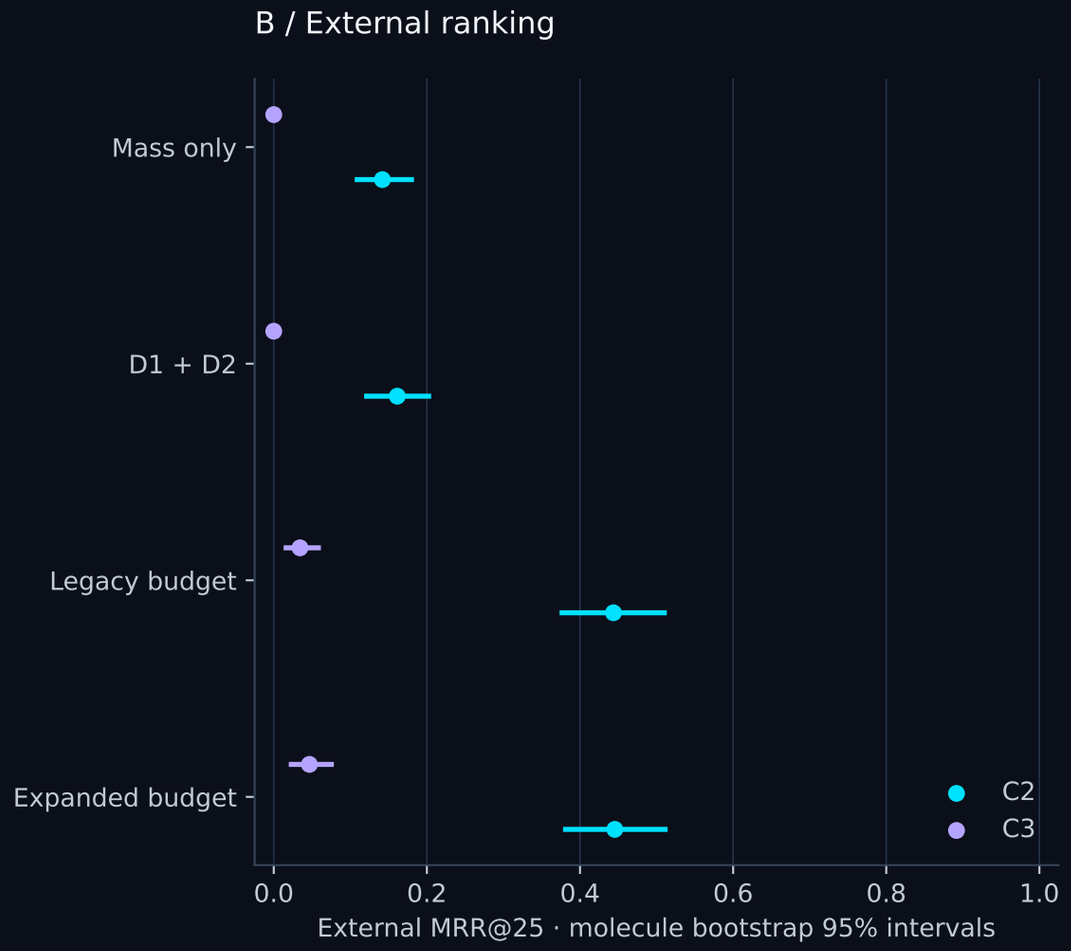
NEXUS / CASMI26

Fresh training · family-purged external evaluation

300 train / 100 development / 150 internal test · 150 external molecules · eight fresh learned artifacts





Primary internal C3 coverage change: +0.0267 [+0.0067, +0.0533]

Selected external families removed from the full rebuilt training/reference corpus. Original-snapshot novelty feasibility did not pass.
Shared independent candidate knowledge remains. Source annotations are not independently authenticated laboratory identities.
